

CSA Medical Supply Now Carries Drive Medical Replacement Parts

April 26, 2017

April 26, 2017 - PRESSADVANTAGE -

CSA Medical Supply offers a wide selection of medical equipment and parts, including Drive medical replacement parts. The equipment includes beds, wheelchairs, knee walkers and rollators.

Jupiter FL: CSA Medical Supply is pleased to announce that they have added replacement parts for Drive Medical Equipment to their online store. Drive medical equipment includes a wide range of products such as rollators, hospital beds, wheelchairs and knee walkers. When there is a part needed for one of the Drive Medical products, the CSA website makes it easy to find a specific part for one of the devices in need of repair or replacement.

Drive Medical Parts will extend the life of the devices necessary for mobility, comfort or other purposes. The model number or product name can be used to search CSA's website. If the customer is unable to locate a particular part, the efficient and knowledgeable customer support personnel are available by telephone or email.

A spokesperson for the company explains, "We are proud that we carry replacement parts for all Drive Medical products. If you bought a Drive product and need a replacement part, we have it. We carry replacement parts for power wheelchairs, power scooters, hospital beds, wheelchairs, knee walkers, walkers and rollators and patient lifts."

He continues, "Specifically, we have replacement batteries for various equipment such as wheelchairs and power scooters. Replacement wheels are another item needed on many of the mobility devices, such as wheelchairs and walkers. We can provide arm rests for wheelchairs, hand brakes for knee walkers and knee pads. For those using hospital beds, Drive replacement items are available for bariatric, semi-electric, electric and manual hospital beds. Those customers who need replacement cradles or slings for Drive Patient Lifts will find the appropriate parts."

For customers who live in South Florida, CSA Medical Supply not only supplies Drive medical items, but will install the replacement part if desired. The customer service team is able to help customers find the correct part for those who are in need of replacement parts.
