

S&S National Waste Celebrates Three Decades Of Construction Debris Removal Miami Beach

May 04, 2017

May 04, 2017 - PRESSADVANTAGE -

West Palm Beach-based waste company offers construction debris removal Miami Beach customers scheduled services based on the needs of the client. The expertise of the team has been available since 1987.

West Palm Beach FL: S&S National Waste and Sheldon Mickelson are pleased to announce that they have reached the milestone of more than thirty years of services to the Palm Beach area. The construction debris removal Miami Beach professionals provide excellent service and the firm is a proud member of the United States Green Building Council. The company is an approved LEED waste hauler, committed to recycling construction debris. The benefits to the environment is recognized by the company, as well as to clients who are seeking certification.

The specific service components offered by S & S include free dumpster rental, grapple service, trash chute installations and portable restroom rentals. The company also provides custom trash chute manufacturing. Scheduling can be set for daily, weekly or monthly pickups. The professionals provide reliable trash removal services to customers. Tight sites, a chute, or pickup of a pile of trash can be handled efficiently and safely.

Since 1987, the family-owned and operated firm has been servicing Miami-Dade, Broward and Palm Beach County with regular or specialized waste pickup and management. Grapple service for removal of construction debris was pioneered by the team at S&S National Waste. Containers can be fabricated to fit the needs of the customers. The company trucks are able to remove debris from locations throughout the service area. Next day service is available if booked prior to 3 pm. Same day emergency service is also available.

According to owner Sheldon Mickelson, "High rise projects are our specialty. We offer customized projects such as high rise buildings, shopping centers, apartment developments and other locations. We can save customers thousands of dollars on labor costs by using our customized trash chutes. Both grapple and roll off

services are available.?

Custom-made grapple trucks can lift as much as 10,000 lbs at once and reach debris up to twenty feet away. Grapple services makes location of cans or trash piles convenient for the customers, rather than driven by the ability of the waste removal company trucks to reach the location.
