

Palm Care Expertise Offered By Tree Services Delray Beach Team

May 04, 2017

May 04, 2017 - PRESSADVANTAGE -

Florida Tree Experts offers professional teams with a minimum of two years of tree services experience. The partners are certified and fully licensed and all workers are trained to perfection.

Delray Beach FL: Florida Tree Experts and Trevor Scranton are pleased to announce that they have the knowledge and experience to handle tree services Delray Beach home and business owners need. Each member of the professional team has at least two years of experience, with full training and full insurance coverage. All partners hold certification and are fully licensed. The company performs a number of tree care related services, but has special expertise in the care of palm trees.

Trevor Scranton spoke in a recent interview, "Obtaining a professional tree services or removal company in Delray Beach, Florida is essential especially if you have a large number of trees. We ensure that you have the best service at a reasonably low and competitive price, with no extra fees, compared to other companies. Pricing may differ depending on the type of tree, the number of trees, sizes of the trees, and frequency of servicing."

All of the professionals use the most advanced tools, trucks and equipment. The actions which are taken avoid aggressive trimming methods which can weaken the tree. Pruning palm trees is important, since it makes the tree healthier and stronger, if done correctly. The FTE team has the right skills and experience to know when the palm should be trimmed.

The company also has the right equipment which ensures safety and efficiency, especially for tall or large trees. A wide variety of services are available, including palm tree trimming, palm tree removal and tree stump removal. They work in a way that will treat, protect and maintain palm trees and shrubs. The services are offered include same day emergency tree service, routine tree care, yearly, quarterly or monthly tree trimming.

Other tree services which the Delray Beach company offers include the removal of all debris, branch removal

and coconut tree trimming. The professionals offer preventative maintenance, corrective pruning, dangerous limb removal and canopy control and reduction.
