

Just Floods Celebrates 25 Years In Business

May 08, 2017

May 08, 2017 - PRESSADVANTAGE -

Naples-based Just Floods offers a quarter century of expertise gained in the water damage restoration industry. The experts provide around the clock services and bill insurance firms directly.

Boca Raton FL: Just Floods a water damage restoration company is pleased to announce that they have reached the 25-year milestone of serving homeowners from flooding and disaster accidents. The company has grown from just serving the Boca Raton area, to over 12 locations in South Florida with more to come under the leadership of owner John Donahue.

"I'm very proud in joining Just Floods employees, clients and business partners in celebrating the company's 25th anniversary and I'm grateful for the outstanding team that we have and the opportunity to continue helping our customers save thousands of dollars in damages on restoration work," said John Donahue.

Water damage can occur when there is a storm causing roof leaks, when plumbing or drains malfunction or when there is foundation failure. Houses and businesses may be deluged when there is flooding from storms

or rising water. When there is a fire, there is not only damage from fire and smoke, but from the water used to put the fire out. Irrespective of the reason for the damage due to water, it is critical to begin the water removal and cleanup as quickly as possible.

There are several stages in the damage solutions. Depending on the type of damage, removal of the water is important to begin quickly. Water and debris on surfaces can quickly be the basis for an overgrowth of mold. Mold spores must be removed correctly, or they will spread quickly in a warm and damp environment.

According to John Donahue, "Most of our projects come from cleanups on single family homes in Florida. We also service office buildings, shopping centers and condos with flooded areas. We are one of the largest water restoration companies in the State of Florida. We are also certified to handle mold remediation with the best practices and equipment at hand. Emergency dry outs are our only business and we understand that when water damage is held to a minimum, water extraction occurs more quickly."
