Jewel Ghost Digital Media Agency Launches New Business and Website

May 08, 2017

May 08, 2017 - PRESSADVANTAGE -

Buffalo-based Jewel Ghost SEO services offers a new business which is dedicated to improving the market presence of business clients. The firm uses search engine optimization techniques to grow traffic and customers.

Buffalo NY: Jewel Ghost Digital Media Agency and Michael Villari, SEO expert, are pleased to announce the launch of a new company and website for businesses and individuals using the World Wide Web. The efforts of the company are focused on increasing traffic and responsiveness of client websites by five-to-tenfold. Today's businesses require Google, the major search engine for responsiveness. More than four out of five of all web searches are performed on Google. More than nine of every ten consumers use search engines to find goods and services.

The efforts of the SEO firm improve the likelihood of the web pages for its clients appearing on the top of the search engine results page. Jewel Ghost SEO services helps clients to avoid losing traction to competing businesses. Capturing prospective customers in cyberspace is crucial to the natural growth of a business. When the website and social media profiles are shared, it creates a significant targeted fan base with customers flocking toward the business in increasing numbers.

According to SEO authority Michael Villari, "We work with Google and its terms and conditions to get you ranking on search engines and withstanding the test of time. It is true that nearly any firm can get rankings on search engines. It is also true that few SEO experts can actually help you maintain those spots after they are done. We have seen firsthand how poor SEO work has turned around and lost websites once a new update for Google is released."

"Because Jewel Ghost is a Certified Google Partner," he continues, "we are always about six to seven months ahead of almost all other SEO agencies."

Buffalo, New York is one of the most difficult keywords to rank for in the country but because Jewel Ghost ranks on Page One of the results pages, clients of the company get what is essentially free traffic. Clients don't have to pay per click. Jewel shares their own successful and ethical tools to build online presence with other business owners locally.
