

Miami Porta Potty Rentals Celebrates 21 Years In Business

May 08, 2017

May 08, 2017 - PRESSADVANTAGE -

In and Out Portables offers more than two decades in operation in the West Palm Beach area. The family owned and operated company was established in 1987.

West Palm Beach FL: In and Out Portables and Sheldon Mickelson are pleased to announce that they have reached a 21-year milestone of service in South Florida. The Miami Porta Potty rentals firm is a division of S&S National Waste, a family owned and operated firm which has been operating in the area since 1997. The rental units are available in a variety of styles and sizes for multiple purposes. The company operates with a mission of excellence in service.

Sheldon Mickelson spoke recently in an interview, "We provide portable toilet services for special events, construction sites, agricultural nurseries, hurricane preparation and relief and other purposes. No rental job is too large or too small. Our toilets are the cleanest and most accommodating in the industry. They are equipped with features such as mirrors, urinals and hand-sanitizer dispensers. We pride ourselves in the cleanliness of our units, unparalleled service and we offer all of this at competitive prices."

A standard portable toilet is a single person facility equipped with a urinal, toilet seat, mirror, toilet paper and hand sanitizer. Slings are available to fly this unit with a crane. A half-high unit is also known as a flying unit. It is suitable for hi-rise construction sites. The unit is steel framed and equipped with a urinal, seat, hand sanitizer, toilet paper, pick point and heavy duty casters for easy movement by crane or elevator.

The company can provide 250 or 300 gallon holding tanks to hook up to an office trailer sewer line. There are wheelchair accessible units with all the standard features except a urinal. A wheelchair unit is sized to accommodate a wheelchair and an assistant. When just a hand wash station is required, the two-sided portable sinks are available. They are equipped with soap, paper towels and 21 gallons of fresh water.
