

New Business Launch For Aerial Photography Brisbane Firm

May 08, 2017

May 08, 2017 - PRESSADVANTAGE -

Brisbane-based Droneworxs Aerial Photography offers fully licensed drone aerial photography and video specialists. The firm is backed by extensive experience in a range of industries.

Brisbane QLD: Droneworxs Aerial Photography and Tony Cook are pleased to announce that they offer aerial photography Brisbane area services by the go-to fully licensed commercial drone aerial photography and video specialist. The professional team is backed by an extensive amount of experience with clients in many different industries, from asset inspection, mapping and surveying to sporting events and everything in between. They have built up a reputation for delivering nothing but outstanding shots time and time again.

Tony Cook spoke recently to an interviewer, "By utilising the latest technology and most sophisticated aircraft and camera systems, we deliver the highest quality and best value drone aerial photography services available in Australia. Our specially designed Drones are capable of flying at altitudes of up to 120 meters (400 feet). We are able to get very close to the action, unlike helicopters or fixed wing aircraft. Our professional drones are specially designed to capture the perfect shot or video, and we can capture the highest resolution still and motion video images to meet all of your aerial photography and cinematography needs."

The latest drones use Real Time Kinematics (RTK) which is perfect for aerial survey inspection. The company is CASA-certified and fully insured. The team is ready to work with customers to ensure full satisfaction with the outcome. Droneworxs is founded on years of training and a background in military aviation and aircraft engineering, ensuring that the 'pilots' are fully equipped to undertake any project.

Each project begins with a risk assessment and job safety analysis. The firm has a priority to adhere to the safety regulations and policies of the Civil Aviation Authority. The safety of all public personnel is assured through mission briefings. Key features of the service include innovation and awareness. The services are particularly applicable to high end real estate marketing, construction progress reporting, commercial real estate marketing and 360-degree panoramas.
