

Wanderlust Socks Provide Plantar Fasciitis Relief

May 19, 2017

May 19, 2017 - PRESSADVANTAGE -

Plantar fasciitis is a common and very painful condition that often happens in people who spend a lot of time on their feet. Meanwhile, Burlingame, CA company Wanderlust is dedicated to creating products that provide relief to the feet and legs of everyday people. Completing a study on plantar fasciitis, its causes, and best ways to provide relief, they have found that their popular plantar fasciitis socks provide tremendous benefits for those who suffer from the condition.

"Those with plantar fasciitis know just how painful the condition can be," says a Team Wanderlust spokesperson. "In fact, many find themselves incapable of walking, particularly first thing in the morning and later in the afternoon, and climbing stairs seems to be impossible to do. Rest is usually the only way to improve the condition, but our PlantarPro Plantar Fasciitis Sleeves also provide a lot of relief and benefits."

The open toe sleeves provide plantar fasciitis relief by applying effective medical grade compression and arch support. These sleeves take up minimal space, which means that people can continue to wear their socks and their preferred type of footwear. Furthermore, they come with advanced KT tape technology, which promotes blood and lymphatic circulation. In so doing, it reduces feelings of stress and inflammation, thereby relieving plantar fasciitis and other similar conditions of the joints, tendons, bones, and muscles.

Wanderlust believes in only providing customers with the best and most effective relief with all their products. This is why the plantar fasciitis sleeves are backed by a 100% 'love at first sight guarantee', providing people with their money back should they not be completely satisfied.

The socks have received in excess of 200 positive reviews, with many people hailing their effectiveness and comfort. "These compression socks work very nicely. This is my first experience with compression wear. I've developed Plantar Fasciitis in one foot which caused considerable discomfort while fitness walking. This sock has virtually eliminated the pain. As described, they are comfortable enough to wear all day, although I typically do not need to do so. They are also easy to get on....," says an Amazon customer.
