

Wanderlust Launches New Ingrown Hair Tweezers

May 19, 2017

May 19, 2017 - PRESSADVANTAGE -

Ingrown hairs can cause a lot of problems. Often, the hair follicle or surrounding pore gets infected, which, in the worst case scenario, can lead to infections. Removing an ingrown hair, however, can be difficult. Wanderlust has now announced that they have developed ingrown tweezers, which are shaped specifically to help get rid of ingrown hairs.

"Our tweezers have been designed to pluck any hair, regardless of its type and location on the body, on the first try," says a member of Team Wanderlust. "Our tweezers are extra pointed, which helps to gently uncover those ingrown hairs. Plus, they have been sanded diligently to always have the right amount of tension and grip."

The tweezers can be used on any type of hair, as well as for removing splinters and thorns. Many women also shape their eyebrows with them. However, they are particularly suitable for ingrown hairs due to the sharp tips, not unlike a needle. As with all Wanderlust products, this product is backed by a full 100% satisfaction guarantee, so people can try it without worries.

While a relatively new product, it is already being positively reviewed, with customers hailing its effectiveness, comfort, and ease of use. "You never know how useful tweezers are until you actually need them. Got these to remove an ingrown hair that had been bugging me for weeks. But I also got stung by a bee shortly after buying these...," says an Amazon customer.

The Team Wanderlust representative also says that the precision tweezers will help people cut their grooming time in half. "Cheap tweezers break, cut, and slip through the hair, which means you have to pull the same hair again and again. With these tweezers, however, this is no longer of your concern. It will help reduce irritation on your skin, as well as fatigue in your hands."

The tweezers are manufactured using highly durable materials and are able to last a lifetime. As such, customers would not need to buy another pair of tweezers in their life again. A pair of tweezers should have pride of place in any family's first aid kits, as well as in any fashion-conscious woman's bag.
