

Wanderlust Launches Womens Compression Stockings

May 19, 2017

May 19, 2017 - PRESSADVANTAGE -

For Burlingame, CA company, Wanderlust, the goal is to make sure everyone is able to live comfortably and be active in a safe way. To achieve this, they have recently released their new womens compression stockings, currently available exclusively on the Amazon marketplace. While having only been available on the market for a short period of time, the stockings have already received a wealth of positive reviews, and the product is rapidly inching towards becoming a best selling item.

"Women and men do have similar needs and physiques, but there are differences to be aware of as well," says a representative from Team Wanderlust. "This isn't just in terms of which type of compression is right, but also in terms of how socks are constructed and what they look like. We have created this pair of socks specifically for women. Available in black, they don't look unsightly like so many medical stockings do. We're happy to see that so many people are already enjoying them."

As with all Wanderlust products, the compression stockings are backed by a 100% satisfaction guarantee. The company promises that women will find the stockings to fit perfectly, reduce fatigue, and relieve pain more than any other similar product on the market. Additionally, the product is made from durable materials, which means they don't have to be replaced too often. And it seems as if their satisfaction guarantee is working, since they have received almost only positive reviews.

"I was having difficulty getting around with severely swollen feet and ankles due to pregnancy, which heat and ice did nothing to alleviate. I splurged on these socks hoping I'd be able to stand and walk for any period of time again and was amazed. With these socks I can stand for hours without any swelling...", says an Amazon customer.

For Wanderlust, these compression socks are ideal for women who spend a lot of time on their feet, who travel, who have diabetes, who are pregnant, who run or work out, or who have any other reason to feel significant discomfort in their lower leg and foot area.
