The Baltimore Plastic and Cosmetic Surgery Center, based in Lutherville-Timonium, MD, is home to Dr. Jeffrey E. Schreiber. He has recently been recognized as the best plastic surgeon Baltimore has to offer in a community poll. Specifically, he has been recognized for his advanced skills in breast enhancement, body contouring, and facial rejuvenation.

Dr. Jeffrey Schreiber himself says: "I am very grateful to have been recognized by a recent community poll. I could not have gotten there without the help of my fantastic staff, and the continued trust and faith of my wonderful patients, of course. So this goes out to them as much as what it goes out to me."

When it comes to tummy tuck Baltimore patients know that they can count on Dr. Schreiber for fantastic results. He was educated at Johns Hopkins University, which is recognized to be one the primary universities when it comes to cosmetic surgery education, and he is board certified. Most importantly, what Dr. Schreiber and his team do is enable people not to completely change how they look, but rather help them bring out and enhance their natural beauty. To achieve this, they always remain up to date with the latest developments, technologies, and procedures in the field of cosmetic surgery.

The reason why Dr. Schreiber came to the attention of the community poll was due to the tremendous number of positive reviews he has received. "Unreal artist," says one of his patients on the center's website. "Dr. Schreiber did my facelift procedure several months ago and he is a true Michelangelo. I look more refreshed without the Hollywood facelift look. I enjoy going out with my friends now and feel so good about myself. My neck is tighter and my cheeks are lifted. You can barely see my scars. If you are considering any type of cosmetic surgery look no further than the wonderful Dr. Schreiber."

Those looking for a dependable Baltimore cosmetic surgery center know that they can count on the skills and expertise of the Baltimore Plastic and Cosmetic Surgery Center, under the supervision of Dr. Jeffrey Schreiber.
