

## **VEEDog Reports Their Software Blocks Ransomware Before It Can Install**

*May 23, 2017*

May 23, 2017 - PRESSADVANTAGE -

Today software security company, VEEDog, reported that their Ransomware software is able to detect and block ransomware before it can install. The software uses pattern recognition to identify potential threats and prevent them from executing. VEEDog was founded with ransomware detection and prevention in mind. Their core operating principle is that new threats must be eliminated as they develop, as there is often not time for the process of wide discovery and patching to occur before serious damage is done.

?Call it real-time evaluation,? says Senior Technical Consultant, Chris Coleman. ?Just about every other solution out there is based on knowing the threat in advance. All the anti-virus and major software companies have teams dedicated to looking for the next bad bug, then getting the patch out as quickly as possible. This is great, but still too slow. VEEDog is on the hunt at all times, right on your system, and we will keep the bad guys out.?

VEEDog operates by evaluating program execution to stop malicious code. It can therefore stop threats that have not yet been identified. Other software must first be aware of the threat, whereas VEEDog evaluates potential threats in real time. This real-time monitoring advances the protection levels of traditional detection

methods, creating a safe environment on the local machine that is being policed at all times. It does not depend on outside updates.

Says Mr. Coleman, "The bottom line is that if you aren't catching the bad guys as they attempt to get in the door, you'll be watching the robbery on a playback of the security tapes. VEEDog recognizes the intentions of patterns of program execution and stops the threat cold -- even if VEEDog has never seen that code before."

VEEDog, Inc. is a U.S. based software security company whose products are designed to detect and prevent next-generation intrusion and cybercrime in the small business market. The company's corporate administrative offices are in Burbank, CA. There are branch offices in Sunnyvale, CA, and in the Philippines. Questions can be directed to VEEDog experts through their web site.
