

Jonnivek Expands Portfolio By Adding Red Barn Tape Measure

June 28, 2015

June 28, 2015 - PRESSADVANTAGE -

Kevin, spokesperson for the company Jonnivek, has announced that they have just launched their latest product, which is the Tape Measure by REDBARN. Shoppers are now able to buy the tape measure on the company's Amazon storefront.

Kevin said that they are very excited with their latest release as they feel it will meet their customers' expectations in every way. One of the main problems many handymen have to deal with when using their tape measure is that it can slip out of their hands very easily. This is because of the slippery metal that is used as a housing for the tape measure. Jonnivek says that the Tape Measure by REDBARN solves this problem by implementing a rubber jacket cover over the plastic case, so slipping is virtually nonexistent.

Another feature that the company says that their customers will love is that the tape measure is in feet and inches, and has a length of 25 feet in total. They added that this is an excellent all-rounder tape measure that handymen, and others who use these tools frequently, will appreciate.

Kevin made the following statement: "we are really excited for the launch of our product on Amazon. We decided to use Amazon as our fulfilling service because we know they provide excellent customer service and fast delivery times. When you combine a top quality service and a high quality product, you can only expect one outcome, which is a satisfied customer."

Jonnivek said that because their tape measure has just been listed on Amazon, shoppers won't be able to view any reviews just yet. He added that when customers purchase the product, to please leave an honest and unbiased review, as this can be a great help for other shoppers who are looking for more information besides the listed features in order to help them make their final decision.

"We want our customers to have all the information in front of them to make the right decision on whether they should buy the product. Being a customer of many products myself, I understand the importance of getting feedback from other shoppers on the product in question", says Keven.

The Tape Measure by REDBARN weighs just over 14 ounces and has the following dimensions: 3.2 x 3.2 x 3.2 inches.

Jonnivek, Inc. stated that they are committed to providing every one of their shoppers with the highest standard of customer service to ensure that they get the best shopping experience when buying one of their products. At time of writing, the tape measure is being sold at a discounted price of \$7.79, which is a 59% discount from the original price of \$18.95.

For those who would like to get more information on the Tape Measure by REDBARN, interested parties are encouraged to visit the company's Amazon storefront, which can be found at the following URL: <http://www.amazon.com/gp/product/B00PH7AYFC> Here, shoppers will be able to view the full list of features offered by this product, and will also have the opportunity to write a review after they decide to buy the Tape Measure and use it for a while.
