MN Remodeling Contractor Launches New Website

June 05, 2017

Golden Valley, Minnesota - June 05, 2017 -
Versatile House Reno Pro, a Minnesota home remodeling contractor, is proud to announce the launch of their new website. The company expects to use this website to market their kitchen, bathroom, and basement remodeling services. The company, which services the entire state of Minnesota, is incredibly pleased with the new website and the potential that it offers.

A representative from the company says: "We really feel like we have finally entered the 21st century with this new website. It properly highlights the various services we offer, and most importantly, it gives us an opportunity to share important information with our existing and prospective customers."

The website has only been recently launched but it is evident that the company is committed to including more information in the following months in order to create strong relationships with their clients, one that is based on trust. What shows this better than anything else, perhaps, is that they have already released a number of different blog posts and other informative posts that explain the need to work with professionals, while at the same time providing important DIY tips.

The representative adds: "Remodeling a bathroom can actually provide an 80% to 90% return on investment, if it is done properly. We recommend that people work solely with professionals, not in the least due to the

plumbing and electrical work involved in this type of work. Furthermore, we also ask clients to think about some of the things that will need their personal decision. Things such as lighting, sinks, bathtubs, steam showers, and current design trends are all very important."

The company is keen to speak to people who are looking for a kitchen, bathroom or other type of remodeling professional. They have consistently delivered high quality work, being fully committed to ensuring that their staff are properly trained on all elements of remodeling jobs. Further information about the work that they do, the materials they use, and their training is available on the new website. Contact details have also been included, so that those who are ready to embark on a remodeling project can do so with ease.
