

Previously Sold Out Magnetic Car Mount Holder By Blue Garuda Mobile Accessories Just Made Available On Amazon

June 16, 2015

June 16, 2015 -

Dominic James, spokesman for the company Blue-Garuda Mobile Accessories, has announced that the Top Rated Blue-Garuda Magnetic Car Mount Holder is now being offered through Amazon after previously selling out. He added that drivers who are particularly concerned about staying safe on the road will find this product to be very useful.

The Blue-Garuda Car Mount Holder has a unique design, as recommended by TLD Today, when compared to traditional clamp-like phone holders. Dominic stated that their approach was to do away with clamps, and rather, to design their product with a magnetic mount that clips to the vehicle's air vent. Blue-Garuda Mobile Accessories said that this approach is far more safe, because there is no risk of the magnetic mount falling when the car is being driven. The big problem most people face with suction mounts is that they tend to fall off after some time, and usually in the most inconvenient times. This can create a dangerous situation because it distracts the driver who should be focusing on the road and trusting that their device will stay mounted regardless of how bumpy the ride gets.

The Blue-Garuda magnetic car mount has special clips that fit into the vehicles air vent, and there is a one touch technology designed into the device to easily mount or dismount the phone. The company stated that this also keeps the device within reach of the driver compared to other suction mounts, which are further away as they have to be attached directly to the windshield. Dominic made the following statement,

"I can think of countless times where I've seen other drivers having to awkwardly stretch their arms out just to reach their phones because they were so far away. This means that they only had one hand on the steering wheel while the other hand was trying desperately to grab the phone. It is impossible for a driver to maintain complete control of the vehicle. What makes it worse is that their eyes are more focused on trying to reach the phone instead of keeping them on the road."

In terms of aesthetics, the Blue-Garuda Car Mount doesn't leave residue marks on dashboards and windshields, which is very typical with suction car mount holders.

Blue-Garuda said that their device has been designed to be secure and universal. Customers are able to use it for all types of phones, mini tablets, e-readers and GPS devices. Their latest car phone mount provides a powerful magnet, and it contains a high quality rubber case to ensure maximum grip and stability. One customer wrote the following review on Amazon,

"Used numerous styles of magnetic mounts, each having some type of glitch. Not so with Blue-Garuda. Everyone I've showed the Blue-Garuda Mount to wants me to order them one. Currently use with iPhone 6 Plus. Drive a lifted Tundra that isn't the smoothest ride. Never have had my phone come loose. Extremely satisfied customer."

Blue-Garuda Mobile Accessories also provides a 30 days money back guarantee. They stated that if customers are not 100% happy with their purchase, that they please contact them directly through their Amazon account so that they can do their best to resolve any issues. For more information on the company's latest car phone mount, please visit their Amazon storefront.
