

MN Kitchen Remodeling Contractor Expands To Serve Minneapolis Homes

June 06, 2017

June 06, 2017 - PRESSADVANTAGE -

Excel Builders, a Chaska, MN remodeling company, is proud to announce that they have been able to expand their services into the Minneapolis residential communities. The Excel Builders - MN Remodeling Company is highly respected because aside from offering home remodeling services, it also provides important advice, information, and guidance to people across Minnesota about finding contractors. With their expanded reach, they will be able to serve a greater part of the community.

Trent Newville from Excel Builders says: "There are dozens of remodeling companies spread throughout the Minneapolis area. Choosing the best one near your location is no easy task. When choosing a reliable renovation contractor you need to make sure you are comfortable with them and that they offer all of the services you are looking for. We provide some guidelines you can use to make the selection process a bit easier. We are a highly respected company and are happy to now offer our trusted services across a wider area to include Minneapolis homes."

The company has also been featured at the Houzz website. The Houzz - Excel Builders of MN page shows 47 of their projects for people to peruse. Past clients have also taken the time to review the company to

discuss their experiences. "Trent did a great job of guiding me through the process," says one past client, for instance. "His designers helped me, his on-site team helped me, and in the end the kitchen is beautiful. They listened to me and inc. my ideas into the design. In the final walk-through there were a couple items that needed to be addressed. Trent took a look agreed then fixed the issues with no problem. I would highly recommend this firm."

To ensure that more people are able to learn about the work that the company does, and that they can access the advice and information they provide both on their website and on Houzz, the Facebook - Minneapolis Remodeling Contractors page has also been launched. This social media page not only features information about past projects, but also relevant external information on remodeling issues, including white board videos and hints and tips to declutter spaces, for instance.
