

Top Luxury Home Builder In Scottsdale Partners With DuPont Tyvek

June 19, 2017

June 19, 2017 - PRESSADVANTAGE -

Peak One Builders & Restoration, a luxury home builder in Scottsdale, has announced that they have entered into a partnership with DuPont Tyvek to bring their customers a greater selection of Weather Barriers. These include the HomeWrap, which provides long-term protection for comfort, peace of mind, and energy savings.

Michael Christensen from Peak One Builders & Restoration says: "We have been and continue to be the preferred luxury custom home builder in Scottsdale and Phoenix, Arizona. We have a complete understanding of the entire home building process and invite you to work with us to craft the custom home of your dreams. Joining forces and becoming certified installers with DuPont Tyvek enables us to complete the building envelope and seal out unwanted air drafts and moisture that can reduce your air conditioning bill and increase indoor air quality to homeowners."

DuPont Tyvek Weather Barriers have been designed to help resist water penetration, eliminate drafts, prevent mold and reduce heating and cooling costs. They also help increase the effectiveness of insulation while providing durable protection to homes. They help to seal the building for a more energy efficient and

healthier home.

Peak One Builders has been building and remodeling luxury homes in North Scottsdale, Paradise Valley, Carefree, Cave Creek, and Rio Verde Arizona since 2002. They are a veteran owned business that is Energy Star certified. They encourage everyone to explore their website for further information on the work that they do and their new partnership.

"Paying attention to detail from the ground up is of utmost importance to our team, ensuring your home will be constructed with high quality materials in a time-sensitive manner," adds Michael Christensen. "Our team prides itself with its open and transparent communication, flexibility, and desire to ensure that there are no questions left unanswered before, during or after the custom home building process. We offer many solutions to building a more efficient home, which ultimately will increase the effectiveness of a homeowner's HVAC system."

As shown on <http://peakonebuilders.com/custom-home-building/>, the company takes a seven step home building approach. This starts with the introduction, where the company learns to understand the needs of their clients, and ends with the warranty, where clients receive a two and a half year guarantee on their property. This warranty is six months longer than what is required legally, further demonstrating the company's commitment to quality.
