High Tech HVAC Makes It Easy To Find AC Companies Near Me

June 21, 2017

Golden Valley, Minnesota - June 21, 2017 -
High Tech HVAC - AC Contractor Services in Minneapolis, MN, has announced the kick off of their AC installation and repair services for the 2017 summer season. Uniquely, they have launched a service that enables people to find the best AC contractor near them in Minneapolis, so that their air-conditioner can be repaired as fast as possible. The company offers five different repair services and ensures that each of the contractors is fully trained and qualified for the kind of service that will be rendered.

A representative from High Tech HVAC says: "In the intense heat of summer, we rely heavily on the comfort of the cool breeze from an air conditioner. Repair is required as soon as anything goes wrong because the last thing you want to do in the middle of July is to be inside a sweltering house or office building. We are here to help across Minneapolis, so we encourage people to visit our website and find their nearest repair contractor to have a problem fixed as soon as possible."

High Tech HVAC offers services for low refrigerant problems, broken outside fans, malfunctioning inside units, faulty wiring, and a frozen inside coil. They have a lengthy and proven track record of providing high quality work. They also encourage people to contact them before their AC unit breaks down, so that it can be

checked even before something does go wrong.

To help people in Minneapolis find the AC company as soon as they need it, High Tech HVAC has also launched an intensive social media campaign. The representative adds: "We want to make sure that our clients have every opportunity to contact us, in a way that is convenient to them. We also want to empower them with knowledge. Hence, we have launched our Google+ page, including various key pieces of information about ACs and common problems. Additionally, we have launched an informative YouTube channel, and we're looking at other social media networks."

On the YouTube - HVAC Contractor channel, a video has been launched explaining the most common problems people experience with their air conditioning units and how High Tech HVAC can help resolve them as soon as possible.
