

COIN Team Offers Training On How To Earn Online Money In Nigeria

July 03, 2017

July 03, 2017 - PRESSADVANTAGE -

The Creating Online Income (COIN) Team, a global training company, aims to help people by training them to earn a legal online income in stable foreign currency. They have announced that they will be offering a full day of training on three ways to earn online money in two cities Lagos & Ibadan in Nigeria, which will take place in July. This training is different from similar programs because it is a hands-on training, where participants learn and then actually implement afterwards what they have just learned. People are encouraged to put their name on the notification list so that they can be informed about the exact date of the training.

The Lead Coach for the COIN Team, Olu Bolarinwa, says: "At COIN, we have developed an intensive one day training session that will show people how they can legally earn online money in Nigeria, in American dollars amongst other stable currencies, in a completely honest way. We are confident that by following the lessons that we will provide, dedicated participants will know how to easily earn \$500 per month by working anywhere there is an internet connection. We encourage people to join our mailing list so they can be kept up to date with developments on this training program."

The training company has also released a free report, which can be accessed through their website. This report highlights the intricacies of legally earning online money, and the potential benefits of doing so. It provides some details about how it can be done, although it does not go as in-depth as what the training program will do. Olu Bolarinwa explains: "During the training, participants will be able to instantly implement everything that they learn. We believe that this is the best way for people to really grasp the concepts of earning an online income, and we will guide them through every step during the day. After the training, they should be able to go home and continue implementing our strategies, earning a nice residual income, legally."

Further details are available through the website, coin9ja.com, where interested parties can also sign up to the notifications list.
