

Renew Pro Now Offering Leather Repairs And Restoration Quotes Via Online Photo Submission

June 24, 2015

June 24, 2015 - PRESSADVANTAGE -

Renew Pro, a Canadian based company, has announced that they are now providing customer quotes through their website via online photo submission. Renew Pro is well known in the leather repair industry for providing tips and tricks for leather furniture care which they openly share them with their customers. The company covers such subjects as fading color, color loss, and professional leather cleaning and repairs. Everything from pet scratches, burns, moving accidents, or natural wear of material can be seen in an informative video on their website.

Another item that the company believes sets them apart from competitors is their mobile service option. Rather than furniture needing to be shipped out to a professional, these professionals come to their customers. The team has been working for more than twenty years, with highly experienced individuals in the field of furniture repair, leather repair, and upholstery cleaning. They have reported that they work on everything from living room couches to boat, car, airplane, and even office seating. The website advises that their cleaning and repair falls under a few specific categories, including furniture-automotive-marine-aviation. They have said the following in regard to the different fabrics and furniture covered:

"Renew Pro has the expertise to restore, refurbish, re-dye and repair virtually any type of damage to leather, plastics, vinyl and fabric. We cover many manufacturer and retail warranties and offer convenient mobile service to your home or business."

The motto of Renew Pro seems to be, "repair-renew-restore", and they offer a fast and convenient quote service which that customers to send in a photo of the damage for an accurate cost. They have advised their customers that by renewing leather furniture, they can save money in the long run as repairs and replacements may become necessary. Proper furniture care and renewing is said to be a far more affordable alternative, and it allows individuals to keep beloved furnishings for longer. Renew Pro says:

"Simply Call or Text a Photograph of Your Damage, and Get a Fast, Accurate Quote. Lightning-Fast Repairs of Damaged Leather, Vinyl, Plastic, and Fabric."

Some of the tips and tricks covered in the video include making sure that all colors used in repairs match as perfectly as possible. Without a matching color, the company says that new fabrics and patching will be obvious. They also suggest that customers don't try a DIY technique at home with a kit or online product unless they have experience with this type of work. Leather furniture can be expensive, and using these products could be damaging if used incorrectly says Renew Pro.

For interested consumers looking for a more in depth explanation or visualization of the work being completed, there are before and after images available on the company website. This helps to supply some insight into the high quality service which can be expected from Renew Pro and their professional team of experienced furniture renewers. They invite individuals with leather repair and renew needs to contact them using the phone number available online, and to feel free to leave feedback and reviews on jobs that have been completed as well. This is reported to help them improve and continue serving their customers in the best way possible.
