

Plumber In DC Announces Remodeling And Renovation Services

June 29, 2017

June 29, 2017 - PRESSADVANTAGE -

Washington, DC plumbing company announced that it is able to assist DC-area residents who are remodeling or renovating their home or business.

Washington, DC -- Plumber in DC, a popular plumbing service provider located in the Washington, DC area, has announced that it will be providing assistance to homeowners and business owners who are looking to remodel or renovate their homes or businesses. According to Plumber in DC, one of the most difficult parts of any home renovation is the plumbing, as plumbing must be delicately rearranged to fit the new layout of the building. Plumber in DC stated that it is well equipped to handle this complex process, given that it uses state-of-the-art equipment and expert technicians.

Plumber in DC went on to state that home renovations in the DC area often include plumbing upgrades, such as the replacement of old pipes and the installation of new features, like bathtubs, sinks, and tankless water heating systems. Plumber in DC stated that it is capable of helping DC-area homeowners with installations

and fixture upgrades as well. According to Plumber in DC, many Washington homeowners add rooms to their home and move appliances around in order to increase the resale value of their homes. Plumber in DC stated that its master plumbers are able to give sound advice that will save DC homeowners from the blunders and pitfalls often associated with such projects.

Plumber in DC also stated that its master plumbers and gas fitters are able to assist with kitchen upgrades as well. According to Plumber in DC, kitchen upgrades require expert knowledge and precise skill, as pipes and gas lines need to be rearranged in a way that is both safe and functional. Plumber in DC stated that it has ample experience with this task, and has completed several successful kitchen upgrades in the DC area.

In its closing remarks, Plumber in DC announced that it is able to provide upgrades and to businesses in the DC area, in addition to homes. Plumber in DC stated that many Washington business owners are looking to either remodel their facilities, upgrade the plumbing in their business, or drastically expand their facilities in order to accommodate increased production or service. Plumber in DC stated that its expert technicians are able to assist with all of these demands.
