New Amazon Marketplace Mexico Added To ManageByStats

July 05, 2017

July 05, 2017 - PRESSADVANTAGE -

Today ManageByStats announced that they have added support for the Mexico marketplace. ManageByStats provides software tools for Amazon sellers in multiple markets, including the US, Canada, Europe (UK, DE, FR, IT and ES) and India. Sellers can now add the Mexico market. The full suite of ManageByStats can now be used to manage sales and customers in Mexico. This includes SellerMail, ManageByStats' automated email notification tool.

"We've been getting more requests for Mexico," says ManageByStats CEO, Philip Jepsen. "Until now the other markets have been very popular and many of our users are selling outside the US. On Amazon, Mexico and Canada are part of any US seller account. We've supported Canada for some time, now our users can add Mexico."

The Mexico marketplace has been growing, and more sellers have been requesting access to the tools for sales in that region. ManageByStats tools are used by Amazon sellers to manage their sales, inventory and customers. The software includes additional tools for automated email notification, email campaigns using either real emails or Amazon emails, the gathering of real emails and phone numbers, reporting and real-time

performance monitoring. ManageByStats supports the management of multiple markets with a single log-in, and to this has now been added Mexico.

“Mexico is live for all tools,” says Mister Jepsen, “including SellerMail, our email notification tool. Existing users of ManageByStats can add it under their Settings, Seller Accounts section. New users signing up can sign up for Mexico during the setup steps. We’re excited to be making this announcement.”

The Mexico marketplace has been released and is available. For more details, or for info on the program itself, please visit the company's website. If interested parties have further questions, the company may be contacted directly by email.
