

# Hail Damage In Denver,CO Receives Rapid Response From Da Lamont Public Adjusters

*June 15, 2015*

June 15, 2015 - PRESSADVANTAGE -

DA Lamont Public Adjusters, LLC, a business based in Springtown, TX is offering rapid help with the building issues people have as a result of the recent hail storms in Denver, CO. A quick response team has been set up in order to ensure these people receive the assistance they need. They hope this will ensure fewer people have their insurance claim rejected.

"Hail damage is covered on most insurance policies, but did you know the burden of proof lies with you, the policy holder, and not your insurance company", says Don Lamont from DA Lamont Public Adjusters, LLC. "We specialize in hail damage. Our team members are trained and certified to document, identify, and prove damage to the insurance adjuster or carrier."

The company has released a great deal of information in terms of why insurance claims can be, and often are, rejected. Sometimes, for instance, an insurance company purposefully delays claims, in the hopes that a policy holder will accept a lower offer as they cannot wait any longer. They may also claim a policy holder had insufficient coverage or have misinterpreted their policy, or that they engaged in some sort of illegal activity that actually caused the damage. Finally, they may claim that the damage was caused by wear and tear, which no insurance policy covers.

DA Lamont Public Adjusters LLC is there to work directly for the policy holder. Insurance companies will do all they can to ensure they pay out as little as they possibly can. For DA Lamont, however, the goal is the opposite: ensuring their clients receive a settlement that is as high as possible. To date, they have had tremendous success with this, particularly in the field of hail damage.

"I was able to turn the entire process over to them so I could continue to run my business without a lot of issues of dealing with all of the other insurance adjusters", says CC Carpet. "They handled them all for me. I am very pleased."

The recent Denver hail storm effectively turned one Denver neighborhood into a winter wonderland. Some

locations saw two feet of hail and a number of vehicles were stuck as a result. The were unable to move until work crews were able to haul the hail away. The severe thunderstorm also included at least one tornado. The damage caused by this storm is still being assessed, but it is estimated that it will be significant and insurance companies are already thinking about how to turn claimants away.

Those who are worried about having a denied inusurance claim or anyone else who has experienced damage due to the hail storm of several days ago are urged to contact DA Lamont Public Adjusters LLC immediately.
