

42 Printable Math File Folder Games Now Available On MathFileFolderGames.com And Teachers By Teachers

June 24, 2015

June 24, 2015 - PRESSADVANTAGE -

Justin Holladay, founder of MathFileFolderGames.com, and also the creator of the math games sold on the website, has announced that their sets of 42 Printable Math File Folder Games are now available on MathFileFolderGames.com and Teachers by Teachers. The latest set of games is perfect for middle school and upper elementary students.

The comprehensive downloadable/printable package is designed to be easily set up for any math class, and when laminated, they can also be made into math board games that are reusable, indefinitely. Justin said that the 42 Printable Math File Folder Games are perfect for third, fourth, fifth, sixth, seventh, eighth, ninth grade levels and homeschool. He also made the following statement when asked what a Math File Folder Game is,

"A Math File Folder Game fits in a folder making it easy to use and ready at a moment's notice. Very few other items are required. You'll need to construct or reproduce the included game boards and have playing cards and dice handy. A few games use other types of geometric manipulatives that are standard items in most elementary and middle school classrooms."

When creating this game, Justin stated that his goal was to make it educational and fun. By taking this approach, students will have an excellent environment to learn basic skills such as problem solving and critical thinking in a variety of mathematical topics, which include arithmetic, measurement, geometry and algebra.

A few examples of topics that are covered in the math file folder game package are volume, linear measurement in standard and metric units, area, similarity, perimeter, congruence, understanding of fractions, practice and strategy with the four basic operations, and many others. Justin also made the following statement,

"By using Math Games at home or in your classroom with your upper elementary, middle school, or high school kids, you can provide them with hours of fun-filled learning time. And the best part is you'll get into the spirit and enjoy yourself, too!"

Teachers are always on the lookout for fun math games for middle school, and a big challenge they face is finding printable math games for middle school that are actually enjoyable. Math is one of those subjects that, depending on how it is taught, can be extremely enjoyable or very scary. By providing the right environment for students to learn, it becomes easier for them to problem-solve, and when this happens, they actually look forward to going to math class.

Justin Holladay stated that he understands the difficulties teachers face when trying to create that "right" environment, which is a reason why he is dedicated a huge part of his life in creating these games. For those who would like to find out more about the games Justin has developed for students, visitors are encouraged to visit MathFileFolderGames.com. For those who are interested in buying the 42 printable math file folder games, they have the option of going to MathFileFolderGames.com or Teachers Pay Teachers. Justin also invites all interested parties who have further questions to contact him by email.
