Auto Glass Company in Dallas Launches New Website

August 04, 2017

August 04, 2017 - PRESSADVANTAGE -

Jacob's Low Price Auto Glass Company has announced the launch of new website. The Dallas based company has rolled out a new website to remain committed in offering top class services.

"Owing to a huge customer base across the United States, we realized that a website would really come in handy especially for those clients that are not based in Dallas. For this reason, we saw it right to come up with a comprehensive website that would help us serve the clientele in a satisfactory manner and feel part of the company," a company correspondent from lowpriceautoglass49.com said.

The family owned business that was established back in 2000, has been in the market for 17 years now and they are slowly proving to be a force to reckon with in the auto glass industry. The company has gone out of its way to have the biggest inventory in the shop in a bid to ensure the execution of the best quality replacements at an affordable price that any client would consider within the same day of service. This means there is no need to leave a car behind at the repair shop.

The website is also aimed at facilitating mobile auto glass replacement services. For those who are not able to make way to the repair shop under any circumstances, they will be able to request services from the company through the website. "For extra convenience and to save a great deal of time, we can come to

client location, whether it is at home or at work place, saving the hassle of arranging drop ? off and pick - up as well,? the Head of Operations stated in an exclusive interview.

?We think that that a more appealing website will resonate properly with our clients in a manner that will show professionalism of services that we get to offer. Again, improving the website to accommodate more services will give us an upper hand when we look at the comparison between us and the other key players in the industry,? said Maureen Mills, the founder of Jacobs Low Auto Glass Dallas.

At a time where the condition of car windows or windscreens is important, the company also hopes to educate the public about the significance of perfect window conditions through their online channel, and why they need to repair them even if there is a small amount of damage.
