

DigitalRez Receives Various 5 Star Reviews

August 16, 2017

August 16, 2017 -
DigitalRez, a business with an office in St. Michael, Barbados, is proud to announce that they have recently received a string of 5 star reviews. In the reviews, customers old and new discuss the benefits they have experienced from using the Rezi reservation management system. Customers have expressed satisfaction for its ease of use and effectiveness.

Kevin Hall from the Barbados office of DigitalRez says: "We love hearing from our customers. We like to celebrate their successes with them, but it also tells us what we are doing right, and where we could improve our services even more. We're particularly grateful to Tamela, who really highlighted the ins and outs of our service and how this has benefited her."

The review in question, which was left by Tamela Guyette of Seawind RV Resort, states: "When asked by other companies to change my reservation system, I emphatically answer no. I enjoy using this program for my campground needs. The others seem to want to charge more for a program that has too many features that I don't need. Y'all call at least once a month to see if we are having any issues with our program. That is wonderful and I hope you keep it up. Most of our issues have been resolved and any that haven't, I know there is someone working on it. Outstanding Tech Support!"

The RezExpert system is a reservation and property management system that can be used by a variety of different businesses. It has been created using the most up to date security and web protocols, boasting a dynamic and rich interface that is easy to use and highly intuitive. Indeed, even large complex businesses such as resort networks and managed communities can utilize the system to their benefit.

DigitalRez is so popular that they have offices in Barbados, Canada, and Australia, from where they serve clients who own bed & breakfasts, campgrounds, hotels, houseboats, inns, kennels and catteries, marinas, mining companies, multi-resorts, RV resorts, strata, backpacker facilities, and more. Kevin Hall adds: "We can accommodate length and width sensitive units, multiple vehicle types, yield management, channel connections, unique lodge and experience packaging ideal for tours, rentals, golf tee times and a wide range of other verticals."
