

Chicago Dental Clinic Now Provides Oral Surgery In Office

August 17, 2017

August 17, 2017 -
1st Family Dental in Chicago, IL, is proud to announce that they now have an oral surgeon on staff who will provide oral surgery at their offices. This means that patients will no longer need to be referred to other practices for oral surgery procedures, as these can now be performed in-office. This clinic has always been committed to delivering as many services as possible within their own premises.

Vicky Khawaja from 1st Family Dental says: "For the convenience of our patients, at 1st Family Dental we provide most dental specialties in-office, now that includes oral surgery. Our goal is to provide an excellent patient experience and that includes not having to refer our patients to other practices for certain procedures. We take a lot of pride in having full-service dental clinics throughout Chicago and the suburbs."

With an oral surgeon as a permanent member of our staff, patients will now be able to access a wealth of new services and procedures. These include bone grafting and dental implants; oral and maxillofacial surgery; and surgical extractions, including impacted wisdom tooth extraction. These are the types of procedures that most people do not look forward to, which is one of the reasons why the clinic was so keen on getting their own oral surgeon in house.

"When people have to have dental surgery, they are often quite nervous," adds Vicky Khawaja. "The last thing they want to hear is that they then have to wait for a long time while they are referred elsewhere, to someone they don't know and haven't grown to trust. Having an oral surgeon in house is far more convenient and much better for our patients."

1st Family Dental is a popular and growing dental pracice, and even more so now that they have a Chicago oral surgeon in place. Joe F., for instance, says: "I can't even begin to explain how much my life has changed since I had my implants at 1st Family Dental. I can't even remember what I was afraid of before I came for my consultation. I hope that if I share my story, someone else who feels like I did will know that there is hope, and they deserve a second chance at having a healthy smile."
