

SMM Group Releases Their Best Selling Oven Mitts In Two Sizes

June 29, 2015

June 29, 2015 - PRESSADVANTAGE -

Mike, spokesperson for the company SMM GROUP, LLC, has announced that their Grill Heat Aid Oven Mitts, which are sold on Amazon, now come in two sizes. Customers can buy them in the following sizes: One size and Lady size. Each glove can also come in a range of 7 colors, which are black, blue, hot pink, mint, orange, red and full black.

Mike said that when they first began selling their grill gloves from grill heat aid, they only came in one size. During this period, the gloves became extremely popular, and more and more people were asking for a size that would be more suitable for their hands. Even though the one size was designed to fit most hands, some felt it was too big. This resulted in the introduction of the Lady size so that those with small hands could get a comfortable experience as well.

Besides being different in size, the oven mitts contain the exact same features. All are 932 degrees Fahrenheit Extreme Heat Resistant EN407 Certified Gloves, have the right thickness, are light in weight and are extremely flexible. The company stated that when they designed these gloves, they wanted their customers to feel completely comfortable while cooking and handling very hot objects. The gloves had to

become one with the customer in order to make this possible, and that is what they set out to achieve. The result, the company said, is a very popular pair of oven mitts that has great reviews written by customers on Amazon. One customer who bought the grill gloves wrote the following review on Amazon,

"My husband and I love these gloves. We bought them specifically to handle our new iron cookware. I am looking forward to also using them at our grill. A-Plus in my book!"

Mike said that the first thing customers will notice is just how effective the grill gloves are at handling very high temperatures. He added that regardless of the heat, it always feels like the object has just been taken out of the fridge. Because the gloves provide ease of usability, unlike older styled gloves that usually feel like a chore when putting them on, customers tend to forget to take the Grill Heat Aid oven mitts off because they feel so comfortable. Another customer wrote the following review on Amazon,

"Haven't used these on the grill yet, but they're great for grabbing very hot objects (like broiler pans) from the oven. Can't say I get close to 925 degrees, but they work well at the 450 degree mark."

Customers will also receive a 100% money back guarantee if they're not completely satisfied with their product. There is also a free no hassle lifetime replacement service on the oven mitts. Mike said that customer service is something they take very seriously, and they encourage all customers to contact them if they have any problems or questions regarding the product. For those who would like more information on the oven mitts by Grill Heat Aid, please visit their Amazon storefront. Interested parties can also go directly to Grill Heat Aid's website to get more details on other products that they sell.
