

Wireless Me Announces Special Offer For Bluetooth Sport Earbuds

September 04, 2017

September 04, 2017 - PRESSADVANTAGE -

Wireless Me in Valley Cottage, New York, has announced a special offer on their Bluetooth Sport Earbuds. The company has stated that customers can, for a limited time, enjoy a buy one get one free offer for the earbuds.

John Kennedy with Wireless Me says, "This is a great time to get a spare pair of earbuds for all of your sport or activity needs. Just pay full price for the first set, and we will send you a second set completely free of charge."

The earbuds, which are offered on the Amazon marketplace, offer a number of benefits, according to Kennedy. They feature a noise cancelling function that enables users to block out all outside noise while wearing, a function that Kennedy says is crucial for avid music lovers.

"You don't want outside noise coming in while you do your workout, jog, or other activity," Kennedy states. "Our noise cancelling feature lets you enjoy nothing but your music, which can actually make you more productive, whatever it is that you are doing."

Those who are interested in learning more can find a number of Bluetooth sport earbud reviews on the company's official Amazon seller's page. Customers rave about the comfort of the earbuds as well as the advantages of the noise cancelling capability. One customer states that the earbuds completely block out unwanted noise and allow for a much more enjoyable listening experience. Studies show that listening to music, or anything else, with earbuds turned up to the maximum volume can be harmful to hearing. Kennedy states that Wireless Me's earbuds allow for volume to be turned down to a safer level because they stop noise from interfering with listening. Users can turn volume down and still hear the music quite clearly.

The company's Bluetooth sport earbuds have been very well received by customers all over the world since their initial launch just a short while ago, and Kennedy says that orders continue to come in for the product. Those interested in learning more about the earbuds and their functions or about the company in general can visit Wireless Me online.

Wireless Me

Wireless Me was formed by electronics engineers tired of big brands over charging for middle of the road technology. We use premium chips, electronic interfaces, and programming, to produce a top end of the market sound at a much lower price.
