

North Texas Primary Care Provider Launches New Website

September 26, 2017

September 26, 2017 -

A primary health care provider in Sherman, Texas, is proud to announce the launch of their brand new website. The website highlights the various services the clinic provides to residents of the Sherman area and beyond. Mainly, it describes how the clinic aims to help others on their journey towards better health.

A representative of the primary health care provider says: "As the first stop in your journey to a better, healthier you, primary care is the center of everything we do - after all it's one of the most important aspects of being - and staying - healthy and in good condition. Whether you're looking for guidance and support, preventive measures to remain healthy and active, or you are seeking a specialist, we're here for you. We provide primary care which is completely patient-centered, using our medical expertise coupled with a modern, caring approach."

The Primary Medicine of North Texas website highlights the primary services that the clinic provides. These include medical weight loss, cosmetic surgery, mental health, and addiction recovery. These demonstrate how the clinic covers all of the important areas for achieving better mental and physical health. The representative adds: "We aim to provide you the best healthcare possible, combining attentive, holistic care

with modern solutions and technology, because we want you feeling your best for optimal long-term health." All services are available to Sherman residents and beyond.

Those who have used the services of the clinic have been full of praise about their results, as is showcased on the clinic's Facebook page. Whitney H., for instance, says: "Always friendly staff. Dr. Hernandez even as busy as he is will always take time to figure out what is really going on no matter how much you think you can hide it. And if there isn't something he can do to help he knows someone who can. The nurses are always nice and friendly. Yes you might have to wait a little longer than other places but that's what happens when the staff isn't just in it for the money." Her testimonial is one of many that basically say the same thing.
