Microwave Cover Continues To Be Popular Despite Rise Of New Hover Cover

September 22, 2017

September 22, 2017 -
Monika's Marketplace, a business in Sanford, FL, is proud to announce that, despite the recent popularity of the newly released hover cover on Amazon, their microwave cover still continues to be a crowd favorite. There has been a lot of attention to the 'as seen on TV' microwave hover covers, and they are now flooding the Amazon marketplace.

Monika, a representative for Monika's Marketplace, says: "There is a lot of hype right now with those new covers, but our covers have stood the test of time. They are not a fad, or a passing trend. These covers have been around for years and we have over 700 positive reviews. We aren't going anywhere!"

Indeed, the vented microwave cover that Monika's Marketplace has offered on Amazon for some time now, continues to be a best selling item. It has been designed to fit most standard size plates and functions as a splatter guard, thereby keeping the microwave oven clean. Because it is a vented cover, it is also incredibly safe, ensuring that people don't get burned. The vent also allows food to remain warm even if it is kept closed.

The product has received hundreds of positive reviews and continues to rank as a 4.5 star item. People have praised its ease of use, efficiency, safety, and the fact that it is so easy to clean, while also raving about the service they have received from Monika's Marketplace itself. "I got this item practically before I ordered it. Not really, but it came much faster than expected. It works beautifully. I love that it's higher and large enough to put two small bowls under it. I also like that you can control the venting. The molded top makes it easy to remove or lift to test the food. They also emailed me a microwave cooking e-book...," says an Amazon customer.

It is no surprise that the product from Monika's Marketplace continues to rank as the best microwave cover. It is proven to be efficient and safe, enabling people to cook delicious meals in the microwave oven, or reheat their existing foods. The company believes that new hover covers may simply be a fad.
