

Choice Pod Claims To Have Unique And Superior Lens Cleaner

June 28, 2015

June 28, 2015 - PRESSADVANTAGE -

Choice Pod, a company based in Hawthorne, CA, has announced that their Lenzies wipes may just be superior to that of the competition. With a jumbo sized surface measuring 5 inches x 6 inches, they report that just one wipe can be used to clean several devices. This comes as a pleasant surprise to consumers who are conscious about the environment, as it leads to less waste, as well as a boost in savings when it comes to money spent on excessive refills. The company reports:

"Customers have reported that the wipes are priceless but very reasonably priced, they last a long time. Just put a box of these out in your office and watch it last for months."

Not only does Choice Pod believe that their Lenzies wipes are more cost effective in terms of size, they also have stated that these products are more moist than competitor wipes as well, and because they come in packages of 100, they reportedly provide a compact method of storage for the home, office, school, and other locations where they may be required. Choice Pod states:

"Marvel at your crystal clear lenses! You might notice how the wipes are cutting through the oily film in seconds yet stay clean 4 times longer."

Lens wipes are each individually wrapped for convenience and ease of travel. They slip easily into a number of portable locations, such as pant pockets, purses, wallets, and briefcase pockets. The company has stated that they can be used on television screens, car mirrors, eye glasses, touch screens, computer screens, doorway peep holes, and other glass surfaces. With their anti-streaking and anti-fog capabilities, the Lenzies provide a quick cleaning experience that leaves no residue or need to wipe again and again. Choice Pod has said the following regarding how well the products work on various surfaces:

"These jumbo 5" x 6" pre-moistened lens wipes are just the right size - not too big and not too small. It takes about ten seconds to clean anything from glasses to touch screens, even clean 3 to 4 things with just 1 wipe. These special lens cloth wipes are gentle and lint free, leaving nothing behind; this is especially noticeable when using to eliminate the static build up around a computer screen that otherwise seems to act as a magnet for attracting more dust."

Choice Pods offer their Lenzies wipes through a number of retail channels, and invite consumers to visit them at their social media platforms on Facebook to see updates, promotions, videos, photos, and more. They also encourage those who are interested in learning more about these wipes, and their power over smooth surfaces, to check out their website blog which offers articles, tips, and advice on a number of cleaning situations. They have been open in how successful Lenzies have been so far, and ask that more customers leave feedback, testimonials, and positive reviews to let them know what they are doing right, and how they can continue serving shoppers seeking high quality wipes at affordable prices.
