

Rip Toned Knee Sleeves Now Available In Germany And Other Countries

September 26, 2017

September 26, 2017 -
Rip Toned Fitness is one of this country's best-known fitness accessory producers. From their headquarters in Las Vegas, NV, they have released a number of important tools and products, each of which has become a best selling item. The company is now in the process of expanding onto international markets and they have recently announced that the popular Rip Toned knee sleeves are now available in Germany, Austria, Switzerland, Liechtenstein, and Luxembourg.

As explained by Mark Pasay, spokesperson for Rip Toned Fitness: "We want to make sure that everybody can access our products and our focus is currently on the European market. We chose to release our knee sleeves on the German Amazon marketplace, because it instantly means that those in Austria, Switzerland, Liechtenstein, and Luxembourg can also access it."

All Rip Toned Fitness products have become best sellers in this country. They have been positively reviewed by thousands of customers and are regularly featured in best of lists by independent fitness experts. The company is also highly respected for its outstanding customer service, which is demonstrated in the fact that all their products are backed by a lifetime guarantee.

Furthermore, Rip Toned Fitness regularly releases fitness-related web content. These include how-to video tutorials for their different products, and also blog posts and other pieces of content highlighting the world of fitness and health. The content, while currently provided in English only, can be accessed by anyone for free.

Although the knee sleeves have also recently been available through Amazon Germany, they have already sold in large numbers and have started to receive positive reviews. Rip Toned Fitness had already made a number of other products available on that market, including their wrist wraps, lifting straps, and lifting belt. Pasay adds: "We're so happy to see that people are enjoying the products we have released. We intend to ensure that all of our products are eventually made available across all of Europe, so watch this space."

The knee sleeves, which are now available through Amazon.de, are also available in other countries outside of the domestic market and the company is committed to further expanding this.
