

Relaunched Inside Door Draft Blocker Found To Be The Perfect Solution

October 16, 2017

October 16, 2017 -

Sanford, FL business Monika's Marketplace has announced the relaunch of their 34 inch inside door draft blocker and that it has been shown to be the perfect solution for blocking gaps in inside doors. Now that summer has turned into autumn and the weather is getting colder, people are once again looking for ways to keep their homes warm in an efficient manner. The draft stopper has been found to be the perfect way to achieve this, particularly with door drafts.

A spokesperson for the company says: "Unfortunately, we have to accept that summer is now behind us. This means that it is also time for coziness around the fire, hot chocolate, good movies, and snuggling up together. Our door draft stopper ensures that people can find such coziness in their homes at a comfortable temperature without having to crank up the heating system and wasting money on their energy bills."

The product has proven to be the perfect solution for blocking gaps on inside doors. It measures 34" in length, which means it fits all standard inside doors. By placing it against the gap, it prevents warm air from

escaping, rendering the overall heating system more efficient. In so doing, people can save money on their gas and electricity bills. The spokesperson adds: "Don't forget that you can also use it during the summer to stop cool air from escaping. Essentially, you can block door drafts regardless of the season."

The draft stopper had been released earlier in the year, during winter, and it received numerous positive reviews at that time. People hailed its beautiful design and its effectiveness, as well as the customer service they received from Monika's Marketplace. "I purchased two draft stoppers as I live in an apartment that gets chilly, even when the heat is on. I had noticed that the area leading out to my sliding glass doors often had a cold draft. I am so, so pleased with this purchase. They are the correct length with just enough weight to them to keep them in place...," says an Amazon customer.

The draft stopper has been designed to be heavy and durable. It can, therefore, easily last throughout the winter and into the summer of 2018. And if people want to keep it in storage, it comes with a free storage bag, which makes it easy to store and keep clean when not in use. The door draft stopper can be found on Amazon.com.
