

Topical Treatment Shown To Be Effective For Toenail Fungal Infections

October 18, 2017

October 18, 2017 - PRESSADVANTAGE -

Perfect Nail Solution is a company in Irwindale, CA, that has developed a natural fungal treatment for toenails. They are proud to announce that a review of 28 published studies of topical treatment for toenail onychomycosis has shown that it may indeed be effective for toenail fungal infections. They anticipate that the product will now become even more popular than before.

Allen Farrar, spokesperson for Perfect Nail Solution, says: "We are very happy to see that several studies have demonstrated that topical treatments work for toenail fungal infections. We have created a completely natural product based on essential oils, and this product has long been very popular. It is good to know that there is scientific backing for what our clients have known for a long time already."

The review of studies that focused on green nail and other fungal infections discussed the known fact that it can be difficult for topical treatments to really address nail problems. This is mainly due to the fact that topical treatments often cannot penetrate through the nail plate. Indeed, topical treatments are often less effective than oral ones. However, oral medication is sometimes not suitable, and the studies clearly demonstrated that, while perhaps less effective, topical treatments do have a positive effect.

"Our topical treatment is different from other similar options," adds Allen Farrar. "This is because it is a two-stage product, which starts with a foot soak. This leaves the skin and the nail soft and smooth and that makes it easier for the essential oils contained in the soak to penetrate through the nail bed. After the soak, the second stage of our treatment, which is a topical oil, has to be applied. Because the nail is already more receptive to treatment at that point, the topical solution finds it much easier to get to work where it matters."

The toe fungus soak has been available on Amazon for some time, where it has received numerous positive reviews. People hail the fact that it is so efficient and has helped them to resolve their fungal infections. Additionally, people are very happy with the natural scents the treatment contains, and how those have a positive impact on the overall health and beauty of their nails.
