

Cruvina Announces Shatterproof Plastic Wine Glasses

October 13, 2017

October 13, 2017 - PRESSADVANTAGE -

Cruvina announced that their line of shatterproof plastic glassware includes stemless wine glasses. The wine glasses are made out of clear Tritan plastic, a high-quality, food-grade, BPA-free polymer.

Erin Moore, Co-Founder of Cruvina, is happy to share "Drinking wine is often part of our social interactions. A good wine can enhance the spirit of any celebratory occasion. Serving wine safely can be a challenge because traditionally wine is served in glasses that can easily break. Because our wine glasses are made from Tritan plastic, they are ideal for stress-free entertaining. Hosts no longer have to worry about breaking glass. They can serve drinks in any setting, indoors or out. All guests, including children and pets, are safe from the shards of accidentally broken glasses."

The stemless wine glasses have been designed with anti-tipping technology and a comfort spill-guard rim. Their classic design is at home in both formal and informal settings, so they can be used both for fancy cocktail parties or at the end-of-summer pool party. The glasses can be used for any cold drinks, from wine to water.

"While there are many different styles of wine glasses available, we have designed ours to have a comfortable weight as you hold it and drink from it," says Ms. Moore. "But more than that, they have an elegant shape that enhances the wine drinking experience."

Each box comes with four glasses, and each glass is completely reusable. Because the plastic used in the glasses is resistant to stains and odors, they will stand up to years of drinking, washing, and reusing, staying clear and clean. Cruvina wine glasses are available on Amazon and come with a 30-day money-back guarantee.
