

## Pensacola HVAC Company Promotes 2017 Energy Efficiency Indicator Survey Results

October 17, 2017

October 17, 2017 - PRESSADVANTAGE -

Pensacola, Fla. ? Every year the Johnson Controls Energy Efficiency Indicator (EEI) survey is conducted, leading to tons of results for any company handling services of HVAC in Pensacola, FL. This study includes results from more than 1,000 facility and management executives in the U.S., Canada, and 10 other countries. The results from 2017 show a resounding attention to energy efficiency compared to years ago with 70 percent of organizations investing in energy saving technologies.

Local business specializing in HVAC like Elite Mechanical Systems wants their customers to know that they are following industry trends by investing in the latest green technology for residential and commercial building alike.

?Studies like the EEI survey are really important to us because they show industry trends,? Michael Solliday said, who is the owner of Elite Mechanical Systems. ?We always try to gauge our customer?s interests so we can provide the best service for them.?

Most often businesses or local residences will call professionals once something breaks or needs repairs?

but it is important to remember heating systems in Pensacola, FL, can be an investment for the future. The Elite Mechanical team urges individuals to ensure that services like the types the company provides are nestled in home maintenance budgets.
