

Company Launched To Provide Pet Products Like Dog Glucosamine

October 23, 2017

October 23, 2017 - PRESSADVANTAGE -

A small family-owned pet company, Zoe Paws, has been launched in Austin, TX. Its primary aim is to provide pet products and supplements that are all natural. None of their supplements contain any artificial ingredients. Rather, they are 100% allergen free and contain no chemicals or fragrances. In fact, they are even safe for human consumption. Their flagship product is the dog glucosamine, which has already attracted a lot of attention.

Joe Jarrett, owner and founder of Zoe Paws, says: "We have worked very hard at creating products that are completely safe for animal consumption. They are so safe that even humans can safely consume them. We're happy to see that people have already tried our products and have noticed a difference in the health and happiness of their pets. At the end of the day, that is what we do it for."

The company has spent a great deal of time preparing the products before launching the company itself. They have sourced the most high quality ingredients available, thereby ensuring that all products are highly effective and 100% safe. All products are made in the USA.

Besides offering pet supplements, Zoe Paws also prides itself on its exceptional customer service. This service extends not just to the people who purchase their products, but also to their pets. The dog glucosamine chondroitin will, after all, be consumed by the animals and not by humans. Joe Jarrett adds: "While our supplement is safe for human consumption, it is made for dogs. If your dog isn't happy with the product, then we will do what we can to resolve the situation. They are as much our customer as you are."

The dog glucosamine chondroitin MSM chew has only been made available for a short period of time, as Zoe Paws has only recently launched and made their supplements available to the public. Yet, the product has already received 11 positive reviews on Amazon, all of which rank it as a 5 star item. People hail its effectiveness, safety, and ingredients and the fact that their four legged friends seem to enjoy it and benefit from it as well.
