

## **Zoe Paws Launches Dog Glucosamine**

*October 30, 2017*

October 30, 2017 - PRESSADVANTAGE -

Zoe Paws, a newly launched business in Austin, TX, has announced the launch of their flagship product, dog glucosamine. The company states that they aim to provide dogs with all natural products that help to enhance their overall health and happiness. This philosophy is something that has instantly given the company a lot of positive attention.

Joe Jarrett from Zoe Paws says: "We, just like most dog owners, love our dogs as if they are members of the family and this means that only the best will do for them. Consider, for instance, that some dog foods contain dead, diseased, or disabled animals, as well as meat from other dogs that have been euthanized. Nobody wants to give that to their dogs. We guarantee that all of our products are completely natural and will always benefit your dog."

Zoe Paws dog glucosamine is currently available on Amazon. It is designed primarily to enhance the mobility of dogs and decreasing pain in the hips and joints. It is composed of three high quality ingredients and it has formulated by a nutritionist to include pure form MSM glucosamine HCl and chondroitin sulfate. No heat process was utilized in producing the product to avoid destroying the enzymes contained in the ingredients.

"Our product includes MSM glucosamine HCl and chondroitin sulfate and is provided as soft chews with

delicious bacon flavor," adds Joe Jarrett. "This supplement is designed to provide dogs with hip and joint support, thereby ensuring they have better mobility. We are particularly proud of the fact that our product is 100% Made in the USA, which is how we can guarantee its quality and safety. Plus, it does not include gluten, dairy, salt, sugar, corn, or soy."

By guaranteeing that the product is Made in the USA, Zoe Paws is fully aware of what goes into the dog glucosamine product. They also guarantee that it can be given to dogs who have dietary restrictions. The dog chews help to prevent inflammation while at the same time providing the necessary antioxidants required to maintain joint health in dogs. Essentially, the supplement improves a dog's quality of life.
