Lake Norman Aesthetics Services Now Offered In Concierge-Style Environment

November 21, 2017

November 21, 2017 - PRESSADVANTAGE -

Lake Norman Aesthetics - Med Spa and Laser Center, based in Mooresville, NC, has announced that they now offer various advanced aesthetics services in a unique concierge-style environment. What this means is that clients can reach the clinic 24/7. This enables those who have questions before consultation, or who need reassurances after their procedure, to contact the medical spa as, and when, they require. Furthermore, it allows clients to make appointments at any time during the day.

Rich Vecellio, owner and operator of Lake Norman Aesthetics, says: "My mantra is 'the expertise you desire, the concierge service care you deserve'. I also understand that each of my clients has a unique goal for aesthetic enhancement and my artistic approach means that each of my clients has a fully customized plan. My personalized service allows unique scheduling to occur in the early morning, lunch hours, late evenings, Saturday after their children's events, and Sunday after church."

One of the clinic's most popular procedures is Botox. On the clinic's website, Vecellio has taken the time to fully explain what people can expect from the Botox treatment, including possible side effects. That said, thanks to the concierge service, clients and prospective clients alike have the opportunity to contact the clinic

at their convenience for any further questions they may have.

Besides offering Botox, Lake Norman Aesthetics also offers a wealth of other services. These include hair removal, Kybella, laser treatments, sclerotherapy, and fillers. Rich Vecellio is also committed to always keeping his knowledge up to date and to learn about any new treatment forms that are being developed. Hence, other treatments may be added as and when they become available.

In terms of fillers, Vecellio's preference is Juvederm, which is used to enhance lip borders, thinning lips, superficial forehead lines, deep folds found on the sides of the mouth, chin, vertical lip lines and wrinkles, and more. He explains: "Juvederm is one of the most recent hyaluronic acid fillers approved by the FDA. This treatment helps to fill aging lines and wrinkles, enhances the lip border, size, and shape of the lips, and minimizes the appearance of some acne and surgical scars. It temporarily adds volume to facial tissue and restores a smoother appearance to the face."
