

Biohazard Cleanup USA Named #1 In The Country

December 04, 2017

December 04, 2017 - PRESSADVANTAGE -

Biohazard Cleanup USA, a company based in Houston, TX, has announced that they have recently been named #1 cleanup company of its kind in the country. This is because they are willing to take on all the dirty jobs associated with biohazard and crime scene cleanups.

Alexander Felsch from Biohazard Cleanup USA says: "We have seen it all. We cleaned up hoarding properties, crime scenes, unfortunate suicides, unattended deaths and more. We're very proud of the fact that we have now been nationally recognized for this. It's a dirty job, but someone's got to do it."

With over 10 years of experience, the company has set itself apart as one the best when it comes to biohazard cleanup. Alexander Felsch adds: "Our goal is to take the stresses of a traumatic experience off your plate, so you can handle all the other elements that go with such a tragic event."

One of the reasons why the company has been nationally recognized for excellence is because of their wealth of positive reviews. Crime scene cleanup services are complex services, not in the least because of the sensitivity involved. The company's professionalism shines through in the numerous testimonials provided by satisfied customers. "Great service and professionalism," says Farid H. on their Facebook page, for instance. "Highly recommended."

Although crime scene cleanup is an essential element of the services offered by the company, they are also regularly called out for hoarding cleanup. Alexander Felsch adds: "At Biohazard Cleanup USA we have all the industry's advanced certifications, and we adhere to the absolute best guidelines for your specific situation. Our specialists listen to your special circumstance and will handle your needs in the perfect manner from the very beginning. Our company's high standards have made us the leading source of crime scene cleanup, biohazard cleanup, and hoarding cleanup experts in the industry."

In terms of crime scene cleanup services, the company offers both meth lab and tear gas removal as well. Furthermore, they offer other forms of biohazard removal services. Lastly, they are certified to deal with a number of potential public health issues, including water remediation, lead paint removal, asbestos removal, and mold remediation. Those interested are encouraged to contact them for further information.
