

Record Peak Designs Launches New Large Claw Tripod Model

December 13, 2017

December 13, 2017 - PRESSADVANTAGE -

Record Peak Designs Inc., a business in Rossland, British Columbia, Canada, has announced that they are launching their new large Claw® tripod model. The phone camera tripod is currently available on Amazon and can be accessed through https://www.amazon.com/s/ref=nb_sb_noss?url=me%3DA3B9U3GWXND2IZ&field-keywords=large+flexible+tripod. Although only recently released, it has already been very positively reviewed and has been listed as an Amazon's Choice item.

Michael McClelland from Record Peak Designs Inc. says: "We're very happy to have launched the new tripod. It comes with a unique design that allows you to take it with you wherever you go. It should be noted that the new larger model Claw® Tripod is perfect for all cell phones, especially the PLUS size phones and will easily accommodate many other devices from Go Pro cameras to SLR cameras. A great deal of thanks to our kind customers who have already told us how happy they are with the tripod."

The Claw features bendable octopus legs, from where it also gets its name. The three legs enable people to set up their camera regardless of the terrain, thus ensuring that it is perfectly stable. This also ensures that

any pictures taken look straight and stable, thereby increasing the quality of the image taken. Michael McClelland adds: "What really makes the tripod unique is that the octopus claw legs are so bendable that they can be wrapped around other objects as well. This means you could hang the tripod from a tree branch or some other similar object and take some absolutely amazing and unique shots."

Those who have tried the tripod have been very pleased with what it offers. Many have also tried an earlier model, which is a smaller one, and were equally pleased with what it could do. People particularly like the remote that is included, as it enables them to take pictures from a distance in interesting positions. "Absolutely amazing tripod. The remote makes many photos possible that otherwise wouldn't be nearly as good, such as macro shots, timed shots, or hard-to-stage photos. It's also allowed me to capture my Ragdoll cats at moments they would never pose for -- since they don't notice the camera without me behind hit. (Sneaky) The tripod is so flexible and yet amazingly sturdy -- especially in this larger size..." says an Amazon customer.

Full details about the tripod are also available on the company's website at <https://recordpeak.com/>.
