

ProH2O Hydration Backpack Promo Code Enables BOGOF

November 29, 2017

November 29, 2017 - PRESSADVANTAGE -

Amersham, Buckinghamshire, United Kingdom company ProH2O has recently released a new hydration backpack. They have announced that they have also launched an introductory BOGOF (buy one get one free) offer, as part of the product release. Those who have used the promo code and purchased the product have already left numerous positive hydration backpack reviews.

Simon Ellicott from ProH2O says: "We have been so excited about the introduction of our new hydration backpack. And we're even more excited that we can sell it with the BOGOF offer and seeing how many people have already been happy and satisfied with our product, this is just the icing on the cake. We have worked long and hard on developing what we believe to be the perfect hydration backpack, and to get so much positive attention for it is a validation of our efforts."

To access the BOGOF offer, as the backpack is available on Amazon, a hydration backpack promo code is applied automatically at checkout. Thanks to the fact that people can now buy two for the price of one, it is the perfect item for couples who exercise in the outdoors together, or for groups of friends or partners, allowing everyone to have a backpack and stay hydrated.

The goal for ProH2O is to allow more people to exercise and enjoy the great outdoors in a safe manner. A lot of people are limited by how far they can run, cycle, or hike due to lack of water. Because this hydration backpack has more space and is considered by many as the best hydration backpack on the market, hydration during outdoor activities is no longer a concern. Indeed, this is one of the many things that customers have picked up on in their reviews. "As someone who regularly goes for 50-75 mile bike rides in hot and humid New York summer temps of 90-100F, this hydration pack was exactly what I was looking for. It can hold a decent amount of liquid and the mouthpiece is very useful so I can keep both hands on the bars..." says an Amazon customer.
