

RezExpert Launches New E Guest Connect Mobile App

December 20, 2017

December 20, 2017 -
RezExpert is a company with offices in various parts of the world that offers a number of digital products. The company recently announced the launch of their new eGuest Connect mobile application, the details of which can be seen on their official website. The new mobile app uses the latest in technology to connect guests with resorts and other properties around the world.

"With our unique system," says Kevin Hall, a spokesperson for the company, "we can help guests interact with resorts through innovative ways that deliver a positive user experience. This helps resorts to see higher revenue and allows them to cut costs."

The mobile app enables travelers to check in and out, pay bills, buy products and learn all that they need to know about a particular resort. Consumers can also leave reviews for others about their stay and view the amenities that each resort offers. Resort managers enjoy a host of benefits from having the app customized, as well, including the ability to accept payments and online reservations.

"It gives resorts the ability to process credit cards directly through the app," says Hall. "You can also manage memberships and you get an online booking interface that you can access directly from your resort website."

Hall says that the app allows resorts to integrate social media pages like Facebook directly into the tabs on the app. The connection is live so whenever social media is updated, the app will automatically update as well. Resort management can also create a contact form that allows guests to send messages directly through the app and an image gallery allows for multiple pictures to be uploaded. Other features of the app include a calendar of events, nearby amenities listings, sister resort information and a video gallery that shows videos of the resort directly in the mobile app.

Resort owners and managers who are interested in learning more about the new eGuest Connect mobile app and how it can benefit them can view this Flipbook and the RezExpert website to learn more and to see a listing of other services that the company currently offers.
