

Marina Medical Hosts Its First Gluteal Augmentation Workshop in Costa Rica

June 17, 2015

June 17, 2015 - PRESSADVANTAGE -

Sunrise, FL ? On May 8, Marina Medical hosted its first Gluteal Augmentation workshop in Costa Rica in partnership with Hospital CIMA and Dr. Luis Da Cruz. This workshop showcased the use of The Triple Tool to achieve optimal results for gluteal implants.

Dr. Da Cruz began the two day workshop with several lectures covering comprehensive topics surrounding the use of gluteal implants and the intramuscular technique. Afterwards, participants were transported to a cadaver dissection for exposure to the associated anatomy. The following day, attendees observed two live surgeries demonstrating the practical application of the theories and teaching from the previous day.

The Triple Tool was designed through a collaborative effort by Dr. Luis Da Cruz and the engineering team at Marina Medical Instruments Inc. This 3-in-1 tool is a dissector, retractor and sizer in one instrument. The rotary dissection creates a safe, thick pocket in less than two minutes maximizing efficiency in the operating room for better patient outcomes. The overall design facilitates optimal control and precision.

?Marina Medical is keen on innovation and is well-known as a pioneer in the plastic surgery field. Together

we have developed the Triple Tool to standardize the steps for consistent and appropriate depth for implant location and the correct thickness of gluteal muscle covering the implant,? said Dr. Da Cruz.

Dr. Luis Da Cruz, a Board Certified Plastic Surgeon, is known in the international community for his ground breaking gluteal augmentation techniques and microsurgery. He is an Associate Professor and Chair of Surgery at the Universidad Hispanoamericana in Costa Rica and Director of the Iberoamerican Institute of Plastic, Reconstructive and Aesthetic Surgery.

About Marina Medical

Marina Medical has been a leader in providing surgical instrumentation for gynecological surgery since 1998. With a deep commitment to technological advances, Marina Medical regularly works directly with top surgeons to develop specialized instrumentation for GYN and plastic surgery procedures. As an exclusive distributor of Koume Lipoplasty products, Marina Medical also provides instrumentation and innovative solutions in the field of fat transfer and regenerative medicine. To learn more, visit their website: <http://marinamedical.com> and join their online community for current news, videos and information about hands-on educational workshops.
