

Marina Medical Upgrades Needle Holder Line for 2015 Based on Customer Feedback

June 15, 2015

June 15, 2015 -
Sunrise, FL ? Marina Medical launched a new line of upgraded needle holders for 2015 introducing exceptional features and a comprehensive range of designs that offer high functionality. After evaluating customer feedback from surgeons, the engineering team at Marina went to work to make several improvements. After months of research and testing, this new line now includes beveled edges to prevent sutures from getting snagged and an effortless locking and unlocking ratchet mechanism. Every detail was examined for improvement down to slimmer shanks for easier handling and the T/C inserts fitted in the jaws of each needle holder for longer wear.

?Our goal in creating this new line of needle holders was to surpass the expectations of our customers and the physicians who use our instruments. These new designs offer the highest level of stability and comfort available,? said Alexander Barron, Marina Medical CEO. ?We listened closely to our customers and refreshed our design to create a durable, innovative instrument that is fundamental for every surgeon.?

For a limited time during the launch, Marina Medical is offering special pricing to website visitors who join their online community. View the entire line at: http://marinamedical.com/needle-holders-2015.

About Marina Medical

Marina Medical has been a leader in providing surgical instrumentation for gynecological surgery since 1998.
