

Midwest Plumbing Greenwood Offers Cost Saving DIY Tips On Toilet Replacement

December 26, 2017

December 26, 2017 -

Greenwood plumbing company recently made an announcement concerning toilet replacement. The company stated that, contrary to popular belief, this can be a DIY task, and its aim is to help homeowners tackle this project themselves.

Midwest Plumbing Greenwood recently shared several tips on toilet replacement. The company stated that the purpose of this announcement was to provide helpful information to Indiana homeowners. Midwest Plumbing Greenwood went on to state that, while many people do not realize it, toilet replacement can actually be a DIY (?Do It Yourself?) task, and its goal was to help homeowners tackle this project with confidence.

Midwest Plumbing Greenwood announced that the first step in replacing a toilet is shutting off the water supply. Midwest Plumbing Greenwood went on to state that the next step is to remove the lid and drain from the tank, followed by the cap and nuts at the base of the toilet. Midwest Plumbing Greenwood stated that

wrenches and pliers are often needed for this step. Midwest Plumbing Greenwood announced that once these tasks are completed, the toilet can be removed. Midwest Plumbing Greenwood recommended placing a rag over the drain opening to prevent fumes from entering the house.

Midwest Plumbing Greenwood then described the tasks needed to install a new toilet. According to the company, the first step is to install new bolts and a new wax seal. Midwest Plumbing Greenwood stated that the next step is to install the new tank onto the new bowl, while also placing the new tank seal. Midwest Plumbing Greenwood stated that homeowners should then place the tank and bowl into the new wax seal, lining up the mounting bolts with the mounting holes in the toilet. Midwest Plumbing Greenwood stated that the final steps include connecting a supply tube to the toilet tank, and affixing the seat to the bowl, using bolts. Midwest Plumbing Greenwood stated that, once these tasks are completed, the new toilet is ready to use.

Midwest Plumbing Greenwood closed by providing some company information. Midwest Plumbing Greenwood has been based in the Greenwood area for several years, and has substantial experience providing plumbing and gas fitting services to Greenwood residents. The company stated that it employs licensed and insured master plumbers and gas fitters, who work quickly, efficiently, and safely. Midwest Plumbing Greenwood went on to state that it operates on a 24/7 basis, in the interest of customer convenience. The company concluded by stating that it conducts business with honesty and integrity.
