Maplewood Chiropractor Offers New Sciatica Treatments

January 10, 2018

January 10, 2018 - PRESSADVANTAGE -

Vertical Chiropractor Health Center, based in Maplewood, Minnesota, is proud to announce that they currently have a sciatica relief special for that burning, tingling pain that comes with the condition. Dr. Rowh's sciatica relief program is comprehensive, to receive the details of the special please call the office. The vision and mission of the chiropractor, which is to help people get out of pain, is highlighted in full on the website.

Dr. Tim Rowh from the Vertical Chiropractic Health Center says: "We are a local chiropractic office dedicated to helping our community get out of pain naturally and noninvasively. We are currently offering a sciatica relief special for that burning, tingling pain associated with this condition. Get a consultation, examination, all necessary x-rays, and your first adjustment for \$39."

People suffering from low back pain often find that they have sciatica. The sciatic nerve is the longest nerve in the body, running from the lower back all the way down to the feet. This nerve can become inflamed or damaged due to general wear and tear, or it can become pinched, in the case of a slipped spinal disc. What the cause of the pain is, however, is usually not that important to patients. Rather, they want to be able to live a normal life again, whereby regular movement is possible. This is precisely what Dr. Rowh offers them, and

the special is almost too good to be missed.

People who have used the services of Dr. Tim have been full of praise about their experiences. Pat L., for instance, says: "After suffering with lower back pain for years, I finally decided to get it looked at. I thought it was just age. I was wrong!! I met with Dr. Tim. After several treatments, I felt great. I haven't felt this great in years."

Those interested in chiropractor services, whether they suffer from sciatica, low back pain, headaches or any other alignment issue, are encouraged to contact the clinic as soon as possible for further information.
