

Versatile Restoration Pros Launches Minneapolis Water Damage Website

January 24, 2018

January 24, 2018 - PRESSADVANTAGE -

Versatile Restoration Pros, based in Minneapolis, MN, is proud to announce the launch of their Minneapolis water damage website. As a company that offers disaster recovery services, they felt that adding water damage to their list of offerings was the next logical step. They are happy to see that people have already started to use the services.

Jeff Mork from Versatile Restoration Pros says: "The most important thing to keep in mind if you are experiencing water damage in your home or on your commercial property is to keep calm. Water damage is very common and you are not alone."

The company covers the Twin Cities MN Metro area and the rest of Central Minnesota and they offer a 24/7 mobile and emergency service and are always ready to go. Furthermore, the company has excellent professional links with insurance companies, thereby helping residential and commercial property owners with their damage claims. The company prides itself on always having the right equipment for the job, and guarantees satisfaction with the services provided.

The company is also able to work with all types of water damage. These include frozen or burst pipes, mold removal and remediation, storm damage, sewage damage, and more. Mainly, they focus on working with people who find themselves in the very distressing situation of having water damage, ensuring that their property is restored as quickly and efficiently as possible.

"For water damage, especially from frozen pipes in house or torrential rain, it is crucial that you act as fast as possible to start the water extraction process, because standing water in your home will only do more damage the longer you let it sit there," explains Jeff Mork. "Our trained crew can be at your Minneapolis home in an hour or less in most cases, ready to get that water cleaned up."

Versatile Restoration Pros prides itself on its professional and efficient service. They aim to help people in the communities they serve get back on track as quickly as possible. Besides working with water damage,

therefore, they also offer services following fires or storms. They encourage everyone to contact them as soon as possible for further information.
