

THE CLAW®

The Claw® Mini Has Received Over 300 5 Star Reviews

January 26, 2018

January 26, 2018 - PRESSADVANTAGE -

Washington Company Record Peak Designs Inc. are known for their versatile, trademarked, The Claw® Mini flexible tripods, which can be used with all types of smartphones, including iPhone. They have recently upgraded the tripod, making its locking head stronger and more capable of holding heavier and larger smartphones. They are now proud to announce that they have received a glowing five star review since doing so, taking their total 5-star reviews to over 300.

"When we originally launched The Claw® Mini, we received a number of complaints that the head wasn't strong enough," says Robert McClelland, co-owner and founder of Record Peak Designs Inc. "We have resolved all of those issues, being dedicated to customer service, but we felt that it was simply not good enough. Hence, we have upgraded the design of our tripod. We're very happy to see that this has been appreciated by our customers."

The Claw® Mini is perfect for all phones, including the iPhone 6s, 7s, and 8s. It also works with other smartphones, as well as with GoPro devices. Furthermore, it is currently available in three different colors, enabling customers to customize the device to their personal taste.

The customer reviews indicate how impressed they were with the customer service. One customer believed

that the product she received was broken and got two replacements, only to find out that she had made a mistake in the installation. Others discuss how helpful the company was in answering questions and more. But mainly, reviewers commented on how versatile and wonderful is the tripod. "Great. I'm 75 and disabled so can no longer get around for the good shots with my Nikon SLR. This allows me to get down for those macro shots with ease and trigger my iPhone remotely. So versatile. I'm loving it..." says an Amazon customer.

Many people have also taken to Facebook to discuss their satisfaction with the product. Specifically, they shared images that they were able to take using the tripod, and many people have also shared images of the tripod in action. Various people have mentioned unconventional ways in which they have used it, such as to read ebooks or to use Facetime.
